

Creatio to InterWeave Payment Gateway Solution

Streamline Secure Payments Inside Creatio

Connect Creatio with your preferred payment gateway for real-time, PCI-aware billing, subscriptions, and automated reconciliation.

Introduction

Unlock seamless, secure payment operations by integrating Creatio with your Payment Gateway using **InterWeave SmartSolutions**. Accept cards and ACH, tokenize and vault payment methods, automate subscription billing and one-time charges, and sync results back to Creatio for complete customer and revenue visibility—without leaving your CRM.

Why Choose InterWeave SmartSolutions?

- ✓ **Deep Payments + CRM Expertise:** Built for finance-grade reliability with CRM usability.
- ✓ **Security-First Design:** PCI-aware patterns, tokenization, and least-privilege controls.
- ✓ **Configurable, Not Custom-Only:** Launch quickly with templates; tailor flows to your policies.
- ✓ **Proven at Scale:** From SMB to enterprise—subscriptions, one-time sales, and hybrid models.
- ✓ **End-to-End Support:** Implementation, monitoring, and optimization with Smart+ Support.

Key Benefits

- **Faster Cash Collection:** One-click charges, automated renewals, and scheduled billing reduce days sales outstanding.
- **PCI-Aware & Secure:** Tokenization, vaulting, and gateway-level compliance minimize risk while protecting sensitive data.
- **Real-Time Visibility:** Authorizations, captures, refunds, chargebacks, and payouts are reflected instantly in Creatio.
- **Fewer Errors, Lower Costs:** Automated reconciliation and webhooks eliminate manual keying and duplicate entry.
- **Scales with You:** Support for multiple gateways, currencies, and products—grow from pilot to enterprise without rework.

Key Features

- **Tokenization & Vaulting:** Store cards/ACH as tokens (PCI-aware) tied to Creatio Accounts/Contacts.
- **Charges & Refunds in Creatio:** Run auth/capture, partial captures, voids, and refunds directly from Opportunities, Invoices, or Orders.
- **Subscriptions & Auto-Pay:** Plans, trials, proration, renewals, and dunning (retry schedules & reminder emails).
- **3-D Secure & Risk Signals:** Optional SCA/3DS flows and gateway risk checks to reduce fraud.
- **Webhooks & Event Sync:** Real-time status updates (authorized, settled, failed) map back to Creatio Payment/Invoice records.
- **Multi-Gateway Flexibility:** Configure one or many providers (e.g., Authorize.net, CardPointe, Run Payments, Stripe, PayPal/Payflow, Moneris) with per-brand routing rules.*
- **Automated Reconciliation:** Post payment results to Creatio objects; optional hand-off to your accounting system.
- **Configurable Mapping:** No-code/low-code object & field mappings, custom metadata, and error handling.
- **Reporting & Dashboards:** Payments, refunds, success/decline rates, and MRR/ARR KPIs surfaced in Creatio.
